

Matias Rivas

Engineering Manager

About Me

Engineering Manager and hands-on software engineer with 7+ years of experience building and leading software teams, with a strong technical background in frontend development using JavaScript and frameworks such as React and Angular, complemented by experience across backend and DevOps technologies.

Currently leading engineering teams at a leading SaaS company, focusing on delivering high-quality, scalable products while fostering team growth, ownership, and continuous improvement. I combine technical expertise with a people-first leadership approach, helping engineers grow their skills, navigate challenges, and deliver meaningful impact.

I thrive in environments that encourage innovation, collaboration, and continuous learning. I enjoy solving complex technical problems, enabling teams to make better engineering decisions, and creating an environment where people can do their best work.

Experience

Engineering Manager | Site Lead@ AppDirect

abr 2024 - Now

As an Engineering Manager, I lead an engineering team of 8 engineers, overseeing the development and execution of projects while ensuring high-quality delivery, effective prioritization, and alignment with business goals. The team is composed of 4 Frontend Engineers (including 3 Senior Engineers and 1 Senior Engineer serving as Tech Lead) and 4 Backend Engineers (3 Senior and 1 Mid-Level Engineer)

Tech Lead @ AppDirect

nov. 2021 - abr 2024

Started as a Semi Senior developer and earned a promotion to Senior Developer, then I've started leading my first team on 2022.

Some of my responsibilities were

- Lead a team of 4 members: 2 front end developers, 1 back end developer and 1 Quality engineer, providing technical guidance and mentorship
- Collaborated with product managers, designers, and backend developers to deliver exceptional user experiences
- Architect, design, and implement front end solutions using modern web technologies (ReactJS, Typescript)

Front End Specialization Teacher Digital House

feb. 2022 - jul. 2022

On my role as a Teacher for Digital House, I have taught courses covering

- Testing Library
- Git
- Redux
- Redux Thunk
- TypeScript
- ECMAScript
- ReactJS, and JavaScript.

Fullstack Engineer @ BTCJ

may. 2019 - ago. 2021

Working side by side with ReactJS on the FE and NodeJS on the BE. Using Bootstrap as a Styles framework.

Front-end Developer @ EcomExperts

apr. 2019 - feb. 2020

Front end developer working with Angular (7.x) and Material Design. Also consuming a GraphQL API. Added some modifications to GraphQL/NodeJS endpoints.

Fullstack developer @ Tres Erres Software

jun. 2017 - mar. 2019

Crafting websites from scratch, direct contact with the customer. Working the Front end with Angular (4.x, 6.x, 7.x) and Material Design. The Back end, first with SLIM PHP as a API and then Laravel PHP, and the DB engine was MYSQL.

Software developer @ Grifo Creativo

mar. 2017 - jun. 2017

Web development (vTiger 6.0, HTML, CSS, JQuery)
QA
Meetings and Demos with customers/clients
